

Only from NEMCO!

The TaskMaster™ Timer

Improve cooking precision and labor efficiency with this amazing multi-channel timer that will have your kitchen humming like a well-oiled machine!

Manufactured In The USA 

Kitchen Sync

From the cooler to the counter, the cooking to the cleaning—and every action in between—when time is of the essence, master it all with this programmable genius that turns even your most inexperienced kitchen staff into a symphony of motion.

One Device. Multiple Reminders.

Lift the fries. Turn the meat. Stir the sauce. Monitor hold times. Heck, keep the restrooms clean every few hours, too. The list can go on, and the TaskMaster™ Timer keeps track of it all—so, your employees never miss a beat.

- Stores up to 64 timing programs, with as many as eight or 16 running simultaneously (depending on the model you choose).
- Volume-adjustable alert, tested in real commercial kitchens, can be heard, without being unpleasant.
- When the alert sounds, the LCD display, with easy-to-read large print, clearly tells the staff what action to take.

Super Simple to Use—No Programming Necessary!

It's literally as easy as pushing a button. Just situate your TaskMaster where it makes the most sense in your kitchen, plug it in and start your timers.

- Comes preprogrammed from the factory, with basic settings—or to your specs.
- Menus and kitchen protocols are easy to update. Just use Nemco's menu editor and upload via the TaskMaster's USB port.
- Square and compact, it sits perfectly on a counter or shelf. Or, use the included brackets to wall mount it.

Suggested Uses

Great for crazy-busy, heavy-volume kitchens of all kinds—especially fast-food, fast-casual, cafeteria and other highly process-oriented operations. Serves as a never-fail reminder for a wide range of continuous kitchen chores, even outside of cooking.

General Specifications

Model	Description	Size (w x d x h)
2550-8	8-Channel Single-Display	8½" x 2" x 4¾"
2550-16	16-Channel Twin-Display	14" x 2" x 5"

Electrical Specification

Model	Volts	Timing Accuracy
2550-8	105–265	±0.5%
